EDUCATION

Massachusetts Institute of Technology (GPA: 5.0/5.0) Cambridge, MA
Master of Engineering in Computer Science, Economics, and Data Science *Expected May 2027*

Massachusetts Institute of Technology (GPA: 4.9/5.0) Cambridge, MA
B.S. in Computer Science, Economics, and Data Science *September 2023-May 2026*
Coursework: Design and Analysis of Algorithms; Econometric Data Science; Applied Probability and Statistics; Machine Learning; Optimization Methods in Business Analytics; Behavioral Economics; Linear Algebra

The Frisch School (GPA: 97/100; ACT 35) Paramus, NJ
High School Diploma | Graduated with Faculty Honors *September 2018-June 2022*
Leadership: Captain of Math Team, Captain of Debate, and Captain of Varsity Basketball; Editor of STEM Journal

EXPERIENCE

Point72 Asset Management New York, NY
Data Research Intern (June 2026 - August 2026)

- Built statistical and machine learning models to extract underlying signals from macro-economic indicators, informing discretionary macro trading decisions
- Researched and back-tested macro signals against historical market data to assess predictive power and robustness across regimes
- Leveraged alternative data to forecast key performance indicators for 26 energy/power companies

Balyasny Asset Management (BAM) London, UK
AI Engineer - MIT Generative AI Lab (February 2026 - May 2026)

- Automated daily energy market report generation across 6 BAM Funds markets, replacing manual analyst review
- Architected a 7-agent Python pipeline with RAG-backed fact-checking to validate market insights against historical data
- Leveraged LLM orchestration to synthesize, evaluate, and format reports, freeing analysts for higher-value research

MIT Sports Labs Cambridge, MA
Research Assistant (June 2024 - Present)

- Developing and training a 'last-touch' detection algorithm in collaboration with the NBA to assist referees in making calls
- Engineered Python pipeline using NumPy and Pandas to identify viable video frames from large-scale game datasets for downstream computer vision model input

DraftKings Boston, MA
Summer Data Analyst (June 2025 - August 2025)

- Applied machine learning and statistical analytics to detect, prevent, and monitor risky user behavior across the platform
- Developed an 'Alert Optimization Tool' to increase detection accuracy while reducing manual review burden
- Optimized financial outcomes by balancing risk mitigation strategies with revenue impact analysis totaling up to \$2M

GroundUp Ventures Tel Aviv, Israel
Venture Capital Intern (April 2023 - June 2023)

- Conducted quantitative and qualitative research on portfolio companies and presented findings in internal firm meetings

LEADERSHIP & INVOLVEMENT

MIT Brass Rat Investments (February 2023 - December 2024)
Part of a team that managed \$100,000 in a Multi-Sector Long-Short Equity Fund: proposed investments based on research

Teaching Assistant – Linear Algebra, Optimization Methods, Chemistry, and Biology (September 2024 - May 2026)
Grade students' weekly problem sets, answer questions on material, and host office hours for students needing additional help.

MIT School Newspaper, Sports Editor (September 2023 - September 2025)
Sole member of the Sports section; wrote and edited all sports coverage for every issue

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Julia, Stata **Tools:** Git, DataBricks, Numpy/Pandas, Pytorch, Scikit, Keras, Tableau
